## Superintendent's Corner

Just a little bit longer and the heat will be gone. We are most of the way through what us Golf Course Superintendents call "the 90 days of hell." We had a perfectly timed rain late in July that helped green us back up. More rain is on the way in the near future and I'm excited.

I would like to congratulate the Club Champions of 2018. The course played somewhat easy this year and the scores reflected that. As always I want to thank the losers for playing in the tournament. It looks good on us to have a big field, plus the Champion thinks they did something special.

We continue to spray the Bermuda in the greens hoping it will check out and die. We have started trimming up some trees and will continue to do so throughout the fall and winter.

See you out on the course,

Daniel Mills, GCS

## TIPS FROM THE PROS

How to you warm up and practice?

After watching the Club Championship, most of our members could benefit from a better understanding of how to warm up and how to practice.

Warming up before a round should reflect what a typical round looks like at the course you are about to play. Write down the number of times you hit your woods, irons, wedges and putter during the club championship and bring it into the golf shop and I will give you a 30 minute lesson for free. When most of us warm up, we hit a couple of wedges, a few irons several drivers, and head to slap a couple of putts on the putting green. If you pay attention to the number of shots you hit on the course and tailor your warm up to this you will see that most of your warm up needs to be on putting followed by wedges and putter.

Practice time needs to be dedicated to where we lose the most shots of each of these groups. After your round stop and think about where you lost the majority of your shots to the field. If you will dedicate more time to these areas, your weak points will become your strengths!
